**Lightning Ethereum**

Self-Sustaining Cryptocurrency

## About

Today blockchain technology changing lives around the globe by bringing new players in every industry you can think of. We are excited to be a part of this cryptocurrency revolution by providing safe and secure Peer-to-Peer transactions to all corners of the globe.

Our goal for Lightning Ethereum is to make it a superior, self-sustaining, Peer-to-Peer cryptocurrency as Satoshi Nakamoto creator of Bitcoin called it Electronic Cash System. We intend to provide wallet and for all coin holders to be able to exchange to other coins. Lightning Ethereum also provide staking at 1.25% per month (15% per annum) in ETL coins.

Soon ETL coin will be used all over the world and become a household name. Lightning Ethereum is a new decentralized cryptocurrency designed to become the best alternative to current popular coins on the market. Built with ERC-20 blockchain technology for P2P transactions to be used around the globe.

We are creating a dynamic platform where participants are able to tap into this highly lucrative industry without the need of any technical understanding to benefit from cryptocurrency explosion.

A blockchain is a digitized, decentralized, public ledger of all crypto currency transactions. Lightning Ethereum will be developed on the Ethereum platform and all transactions and events can be tracked via EtherScan. Based on the Ethereum ERC20 platform, the Lightning Ethereum token will have all the strengths of Ethereum and blockchain technology, ensuring security for transactions. Adding to the blockchain unique features such as Trading and staking as well. Lightning Ethereum comes in with a familiar and easy to use structure and interface, users will be able to send and receive payments, as well as trade and exchange to other currencies when listed on exchanges. We believe cryptocurrencies should be available and accessible to all people of the world.

## **SAFETY AND TECHNOLOGY**

Lightning Ethereum is based on Ethereum blockchain technology as one of the fastest, safest and easiest forms of transactions for blockchain technologies.

## **COIN ABBREVIATION      ETL**

## **TRADING**

Every user can trade Lightning Ethereum through out the world on external exchange when ETL added to exchanges. Lightning Ethereum will be using an Ethereum based blockchain, which will provide faster, safer and cheaper way of transacting around the globe.

## **STAKING REWARDS 1.25% per month (15% per annum)**

If you don't want to trade Lightning Ethereum (ETL) then just hold it. You will get 1.25% rewards per month from holding Lightning Ethereum (ETL). All you have to do to earn with this method is to hold coins in your wallet. This means anyone holding Lightning Ethereum (ETL) in their wallet will receive interest on their balance in return for helping maintain the security of the network. The 1.25% reward is generated through our mining eco-system and therefor we are able to provide the reward.

## **LIFE TIME FREE TRADING ON OUR EXTERNAL EXCHANGE!**

All Lightning Ethereum ICO participants will be able to trade for free on our external exchange when become operational.

## **20%- 30% REFERRAL COMMISSION PAID WITH BITCOIN OR ETHEREUM WITHIN 24 HOURS.**

All people around the world have the opportunity to promote the Lightning Ethereum ICO and earn 20% to 30% commission should you decide to work as an independent recruiter. Lightning Ethereum allows people worldwide to enter into the Crypto Currency market at a very low price of the same as the first Bitcoin when started in 2009. You can earn commission in Bitcoin or Ethereum when your referrals purchase has been completed; your commission will be sent directly to your wallet address within 24 hours.

This document is provided for your information only and that under no circumstance should it be considered an effort by Lightning Ethereum to either promote or sell stocks or securities on its platform or on any other related or associated company's platform.

### **LIGHTNING ETHEREUM tokens are not securities and not to be considered an investment**

You understand and fully accept the fact that Lightning Ethereum is not securities under any circumstance, neither are they registered with any government entity as a security. You fully understand and accept the fact that ownership of

Lightning Ethereum does not grant you the right to expect or to receive proceeds, revenue, or other payments or returns arising from the attainment, holding, administration or disposal of, the exercise of, the redemption of, or the expiry of, any right, interest, title or benefit within the Lightning Ethereum platform or any other Lightning Ethereum property, partially or entirely except where clearly indicated in the How You Earn section of the Lightning Ethereum website.

Lightning Ethereum team will do its best to proceed with the project described within this white paper and complete it at the best of its ability, unforeseen circumstances might not allow the completion of the project in whole or partially. Lightning Ethereum tokens can never be considered an official or legally binding investment of any kind and purchasing the token is done at your own risk.

### **Proceed or coins earned are not any form of warranty**

The purchase of Lightning Ethereum tokens is done at the buyer's own risk and under no circumstance should the buyer hold Lightning Ethereum accountable for any kind of losses as there are no warranties that the Lightning Ethereum token will in fact increase in value or hold its value.

Unforeseen circumstances such as war, strike, riot, crime, or any kind of natural disaster or even any other unforeseen events over and above the control of the Lightning Ethereum token's developers could, at all times, badly affect, even irreversibly so, the token's price.

### **Risks associated with trading and regulation**

Cryptocurrency trading occurs in a highly volatile environment where rapid and large price movements occur frequently. While all precautions are made and stop losses employed, there is a high risk of loss in any trade. Under no circumstance can any figures given in this white paper or in any other documentation, including but not limited to web, email and print, be taken as a guaranteed profit. All trading is risky where there is potential for loss, and by participating in the trading you are doing so at your own risk.

ICOs and blockchain-based cryptocurrencies are mostly unregulated at present. Efforts are being made by various regulatory bodies around the world including central banks and governments to supervise, regulate or even restrict the cryptocurrency market. Such actions could greatly affect the functionality and value of the Lightning Ethereum token as well as that of other cryptocurrencies. The anonymous nature of Lightning Ethereum reduces these risks, but does not eliminate them.

## **Risks associated with new technology and quantum computers**

Lightning Ethereum tokens and cryptocurrency tokens in general are a relatively new and untested technology. Due to this nature, technology-related unforeseen events may occur at any time. Traders understand and fully accept all types of related risks involved.

Despite the efforts made by the blockchain community to safeguard the security of cryptocurrency technology, the potential development and deployment of quantum computers or any other kind of advanced types of computers in the future may put this security at risk. In such a case, the Lightning Ethereum token will be affected as well.

## **Blockchain related risks**

Lightning Ethereum tokens will be issued on the blockchain, thus being dependent on the integrity of blockchain. The functionality of the Lightning Ethereum tokens or the Lightning Ethereum platform will be severely affected in the highly unlikely event that the blockchain malfunction or fail.

## **No insurance for funds provided**

Any and all types of cryptocurrencies collected during PRE-ICO and ICO are in no way insured. Funds may lose their value in whole or completely without warning. There is no legal entity or insurance company, private or public to turn, should something go wrong with the funds provided.

## FAQ

### **Q: What is Bitcoin?**

A: Bitcoin is the first decentralized digital cryptocurrency and worldwide payment system that works without a central bank or administrator.

### **Q: What are ETL Tokens?**

A: ETL tokens are ERC-20 compatible tokens distributed on the Ethereum blockchain pursuant to a related ERC-20 smart contract.

### **Q: How can I buy Lightning Ethereum?**

A: You can buy Lightning Ethereum during ICO pre-sale and ICO sale.

### **Q: How do I pay for Lightning Ethereum?**

A: You can buy Lightning Ethereum using ETH and BTC only.

### **Q: Is there special volume purchase discount?**

A: Yes, to find out more about special discount please contact [support@lightningethereum.com](mailto:support@lightningethereum.com)

### **Q: What are the staking rewards?**

A: All you have to do to earn with this method is to hold coins in your wallet. This means anyone holding Lightning Ethereum (ETL) in their wallet will receive 1.25% monthly rewards on their balance in return for helping maintain the security of the network.

### **Q: Is Lightning Ethereum anonymous?**

A: Yes, Lightning Ethereum is anonymous cryptocurrency and uses the most advanced decentralized and deregulated blockchain technology.

### **Q: When do I receive ETL Tokens?**

A: After your payment received, your ETL will be sent to your ERC-20 compatible wallet (MyEtherWallet). Please enter your ERC-20 address by logging on to your account, click on ETL coin on the top right corner, click on my profile, enter your ERC-20 address, click update profile detail. This is where your tokens will be sent.

### **Q: Why don't I see my referral bonus and purchase bonus?**

A: Transaction must be completed for the bonus to show up on your account, tokens to be sent to you and commission for all referrals to be paid to you. Here is what you need to do to complete your transaction when you make payment:

- 1- Please enter your ERC-20 address by logging on to your account, click on ETL coin on the top right corner, click on my profile, enter your ERC-20 address, click update profile detail. This is where your token will be sent.
- 2- From your back office click on coin collection list, click on update transaction (in yellow); enter your transaction id (for either Bitcoin or Ethereum payment).
